

Paris, December 5th 2007

President of the French Republic Nicolas Sarkozy accompanied by Christian Girardeau, Citilog's CEO During French Delegation Visit to China November 24-28, 2007.

Paris, France – Dec. 5, 2007 – Citilog, a world leader in advanced video-based monitoring and surveillance products for the Intelligent Transportation Systems (ITS) market was selected to be part of a French delegation during a visit of French Republic President, Nicolas Sarkozy, to China along with seven other ministers and 40 others Chairpersons and CEOs.

The purpose of the delegation was to discuss French-Chinese business opportunities. President Sarkozy demonstrated France's strong support and commitment for business opportunities with China to the 40 companies along with three top priorities: competition, innovation and sustainable growth.

Citilog is a world leader in providing video-based monitoring and surveillance products that enable the ability to identify incidents in real time instead of traditional passive solutions that act only to verify an incident after it has already come and gone. In use at some of the world's most famous bridges, roadways and tunnels, the company's products are ideal for industries such as traffic and transportation and security and safety management. The company is a spin-off of Institut National De Recherche Sur Les Transports et leur Sécurité (INRETS) (English: National Institute of Transport Research and Security). The company is represented in China by two distributors in Beijing and in Shanghai, with an office in Hong Kong since September 2006.

"China is a fast growing market for our company with more than 37 road safety systems commissioned," commented Girardeau. "China represents a strong opportunity to roll-out our cutting-edge technology solutions for Intelligent Urban Traffic Management. Our latest system implementations in China include the Hangzhou Tunnel and the tunnel in Shiman (in the Hubei Province) which were carried out with our partner BEIJING NAVIGATOR, and the Wuhan Changjiang and the Wuxi Lihu tunnels carried out with our partner SHANGHAI XIANJIN.

Citilog is a world leading provider of intelligent real time video monitoring and surveillance solutions. Citilog's suite of software-based products provide instant incident detection to enable proactive rapid responses that aid in minimizing risk and losses in operations or security. The company's products enable immediate and efficient traffic, safety and/or security management of roadways, tunnels, bridges, intersections, as well as for facilities or transportation resources such as, airports, railways and sea ports where criminal or other security threats exist. Products are deployed at some of the world's best known landmarks such as, the Lincoln and Holland tunnels in New York; Lupu, NanPu and Yanpu bridges in Shanghai, China; M30 Madrid tunnels in Madrid, Spain; the Mont-Blanc tunnel spanning France and Italy and dozens of other locations. A privately held company, Citilog is based in Paris, France with international offices in the USA and Hong Kong. More information is available at <http://www.citilog.com>.
